

## How Do I Know if My Business Needs a Virtual Chief Information Officer (vCIO)

Is your business and technology aligned? Are you spending too much on IT? Do your IT systems enhance productivity and align with industry standards? Do IT projects run on time and on budget?

vCIO gives you access to on-call expertise and leadership when you need it, so your business can make better informed IT decisions. **But how does a business know if they should enlist the services of a Virtual Chief Information Officer?**

**Our experts have compiled a comprehensive checklist to help businesses decide whether vCIO is the right choice.**

**Questions about current technology arrangements:**

	YES	NO	UNSURE
Am I getting value for money from my current IT?			
Is my business investing in the right solutions and areas of IT?			
Are IT projects completed on time and on budget?			
Do I know where my business stands when it comes to subscriptions such as internet, phones, hosted services, and software?			
Do my staff experience frustrations when it comes to technology systems?			
Does my hardware capacity support modern technology?			
Is my IT being proactively managed and improved to support my business as it grows and changes?			
Do my team have appropriate training in Microsoft Cloud platforms including SharePoint Online, OneDrive, Teams, and Office?			
Are we using the most suitable IT products and services?			
Do I know if my business should be in the cloud?			
Do I know where to start if I want to move my business to the cloud?			
Are my systems secure and backups tested regularly?			
Do staff use manual processes that could be automated with technology?			
Do I have appropriate strategic planning and project management for IT projects?			
Does my IT provide an edge over competitors?			

**Additional questions if you have an internal IT team:**

	YES	NO	UNSURE
Are my internal IT resources providing maximum return on investment?			
Does my team have the right tools to efficiently manage IT in the organisation?			
Are my systems, configurations, and processes fully documented?			
Does my IT team have appropriate training and mentoring?			
Is coverage available when my IT staff are unavailable?			

**If you answered unsure or no to any of these questions, it could be worth having a chat to our team. Contact us today for a FREE technology analysis.**
